

**SHORE CHEMICAL COMPANY
BULK METHYL BROMIDE DISPENSER**

SHORE CHEMICAL COMPANY 5 LB METHYL BROMIDE DISPENSER

THIS DISPENSER IS DESIGNED FOR DIRECT ATTACHMENT TO CYLINDER VALVE TO PERMIT EASY APPLICATION OF BULK METHYL BROMIDE FOR ALL SOIL AND SPACE FUMIGATION.

THE DISPENSER IS CALIBRATED IN EASY TO READ 1 POUND DIVISIONS.

SMALLER AMOUNTS CAN BE ACCURATELY MEASURED BY DIVIDING CALIBRATIONS; LARGER AMOUNTS BY REPEATED FILLINGS.

EVACUATION, BY GRAVITY AIDED BY PRESSURE IN DISPENSER ASSURES COMPLETE AND RAPID APPLICATION OF ACCURATE DOSAGES.

GUIDE TO OPERATION:

- ATTACH DISPENSER TO METHYL BROMIDE CYLINDER VALVE WITH SUPPLIED ADAPTOR MAKING SURE AN AIR TIGHT SEAL IS MADE.
- MAKE SURE DISCHARGE TUBE IS SAFELY SECURED BEFORE COMMENCEMENT OF OPERATION.
- CHECK THE OUTLET VALVE AND SMALL AIR BLEED VALVE ARE BOTH TURNED OFF.
- OPEN CYLINDER VALVE SLOWLY UNTIL DESIRED DOSAGE REGISTERS ON GRADUATION GLASS.
- CLOSE CYLINDER VALVE TIGHTLY, AND RELEASE METHYL BROMIDE BY OPENING DISCHARGE VALVE.

SOMETIMES, BECAUSE OF HIGH ATMOSPHERIC TEMPERATURE OR LOW PRESSURE IN THE CYLINDER, THE DISPENSER WILL NOT FILL TO THE DESIRED LEVEL. WHEN THIS OCCURS, HEAD PRESSURE MAY BE RELEASED WITH CAREFUL USE OF THE BLEEDER VALVE. THIS WILL PERMIT EXCESS PRESSURE TO ESCAPE THROUGH DISCHARGE TUBE.
